Land proofs 10.00
Notice of forfeiture 15.00
Contest notice 15.00
All other legal advertising, per inch, each
insertion \$3.00

AUGUST 11, 1911.

THE COUNTY FAIR

Graham county will hold its sec-
ond annual fair this year, and from
what we learn of the plans of the
Fair Association, it will surpass any-
thing of the kind ever held before
in this county or any county in the
Territory.

The work of preparation has al-
ready started, and it is intended to
provide for the largest exhibit of
farm and dairy products ever placed
before the public.

A new feature this year will be
the exhibit of the work of the
schools of the county which will
naturally come with the Teachers'
Institute to be held in Thatcher,
the teachers of Gila, Graham and
Greenlee counties having decided to
hold a joint institute this year and
selected the town of Thatcher as
the meeting place. This being the
first institute of the three counties,
the fair directors will exert them-
selves in making it a success and
bring out prominently the work of
the pupils of the public schools.

Another feature will be the ex-
hibit of woman's work and this de-
partment along with that of the ex-
hibition of school work will be spe-
cially taken care of in a building of
its own.

Besides the dairy and farm ex-
hibits, there will be a horse and
cattle show. Poultry raising, which
is rapidly coming to the front as a
successful valley industry, will have
a department to itself. The bee in-
dustry will also have special atten-
tion and will undoubtedly prove a
very interesting exhibit.

The exhibition of fruits and flow-
ers grown in the valley this year is
expected to surpass any exhibition
of the kind at a county fair or the
Territorial fair.

Special attention will be given
this year to the horse races and
other sporting events which always
form part of a county fair. An
effort will be made to secure some
of the fastest runners, trotters and
pacers in the Territory, and the
card will be prepared each day with
a number of running and trotting
events.

It is also intended to have a base-
ball tournament. The local team
and the leading clubs of the Terri-
tory will be invited to participate
in a series of games, the winner to
receive a handsome prize.

The fair grounds will be improved
and new buildings will be con-
structed to provide for the different ex-
hibitions. The race track will be
put in fine condition for the horse
races and this work will begin at
once.

Altogether the county fair this
year will be the best planned and
should be the most successful fair
ever held, its main object being to
bring out prominently the improve-
ments that have been made in the
farming industry of the valley, as
well as to establish the fact that we
have the finest agricultural spot in
the Territory, blessed with a climate
that has no equal anywhere in the
country for health as well as the
successful tilling of the soil.

The county fair this year will be
held under the direction of the board
of supervisors and a fair commission.
The board of supervisors and fair
commission will direct all the work
of managing the fair in the interests
of the people of the county.

Senator Bailey's resignation from
the Committee on Elections and
Privileges leaves him out of the
Stephenson investigation. But, then,
he had probably wasted all his tears
over Lorimer.

EDUCATION AND AGRI- CULTURE

Universities throughout the coun-
try have awakened to the present
day need of a deeper application on
the part of our college men to the
study of agriculture in all its various
branches. Not detracting from the
advantages of the many professions
that are encouraged in most educa-
tional institutions, suffice it to say
that there are, each year, graduated
from institutes of learning more law-
yers, doctors, dentists, teachers and
preachers than are required, while
the country stands in absolute need of
attention by minds and men scientifi-
cally trained in all of the varied
branches of agriculture.

There is need of a course in agri-
culture that will be complete, and
offer a term of study fitting the
student to play an important part
in the general development of the
nation. With the advance of irri-
gation, dry-farming methods, scien-
tific plant breeding, intensive farm-
ing, seed selection, soil physics and
fertility, the various branches of an-
imal husbandry and modern methods
of water and rainfall conservation,
the need of scientific training is be-
coming more necessary. In this age
of competition the combination of
science with practical experience will
help in a large measure to overcome
the problems of crop uncertainty,
which yearly occasions chaos and loss
to the nation. Instead of this con-
dition, a system of crop reliability
ever increasing in usefulness and
scope will be developed by the col-
leges where agriculture plays an im-
portant part in the educational work.
Arizona has been quick to realize
the advantages of scientific agricul-
ture and prompt to establish a four
year course at its University at Tuc-
son, which is perfect in complete-
ness and which carries with it the
degree of B. S. The University is
entitled to the hearty commendation
of the agricultural interests of the
country at large for taking this step,
the effect of which will be of nation-
al importance.

FOLK'S PLEA FOR OLD PARTY

At Minneapolis, Joseph W. Folk
said: "It is a question for us, not
of founding a new party, but in the
preservation of the ideals of the old
party. Not the formation of the
new government, but the purifica-
tion of a nation's life. Not the con-
quest of foreign foes, but the sub-
jection of those within. The capac-
ity of a people for self government
is to be provided not by the glitter
of wealth, nor bravery on battle
fields, nor by the extent of the na-
tion's dominions, but by the happi-
ness and welfare of the average
man. The dangers today are not
from without. Selfishness, greed,
avarice, privilege, the decay of pub-
lic virtue, those who would subvert
the public function of government
to sordid use—these enemies we
have to fear."

"There can be no peace between
these enemies and the people's safe-
ty. We cannot avoid the conflict
with them without being recreant
as democrats and traitors to our
better natures. It is not enough
for us to rest upon the splendid his-
tory of the democratic party; there
must be hopes and aspirations for
the future as well as history and
records of the past. No man, no
nation, no party, can stand still—we
must progress or decay."

"Progressive democracy is con-
structive, not destructive. It would
not array class against class but pre-
serves the rights of all by causing
each to respect the rights of the
other. It does not attack wealth
honestly acquired, but the privileges
that produce tainted riches on one
hand and undeserved poverty on the
other. It favors the protection of
property rights, but recognizes the
fact that property rights should not
be inconsistent with human rights.
It seeks as a remedy for existing
evils more government by the peo-
ple instead of less government by
the people. It appeals to conscience
instead of avarice, and to the com-
mon good instead of private greed."
—Columbia (Mo.) Herald.

Seemed to Give Him a New Stomach

"I suffered intensely after eating
and no medicine or treatment I tried
seemed to do any good," writes H.
M. Youngspeters, editor of The Sun,
Lake View, Ohio. "The first few
doses of Chamberlain's Stomach and
Liver Tablets gave me surprising
relief and the second bottle seemed
to give me a new stomach and per-
fectly good health." For sale by
Safford Drug Co. 24-4t

THE SUBSTANCE AND THE SHADOW.

—Macaulay in New York World.

How Paper Came To Be

Long years ago a Japanese walked
through his pretty garden to his
home, his hands were clasped behind
his back and he was thinking, as he
crossed the bridge to pluck a fresh
wistaria blossom that hung just over
his head. This little gentleman had
a great many parcels to send out
from his shop every week, and he
had always wrapped them in silk,
but this was an expensive material
and he needed something cheaper
for his purpose. All at once a wasp
came flitting toward him, but he
thrust it away that it might not nip
his nose, and lo! there at his hand
was a wasp's nest. It was made of
thin wood pulp, softened into a thin
paste by the jaws of the insect, then
formed and left to dry.
"Why can't I do that same thing?"
thought the Japanese merchant.
"Get certain wood, form it into a
pulp by means of water from the
river and make something like
the wasp's nest in consistency, to
wrap about my packages." So
this was the way paper was first dis-
covered: A wasp flew across the
path of a man who walked one day
in a vineyard garden of Old Japan.

Swats Flies With Soap

A physician living on the South
Side has invented a rather novel
method of ridding his house of flies.
An ordinary drinking glass half filled
with soap suds is placed in a con-
venient window sill. A slice of bread
with a small hole cut in the middle
and spread on the under side with
molasses, covers the glass. The flies
alighting on the bread, crawl
through the hole to get to the mol-
asses. There they are soon over-
come by the fumes from the soapy
water, and fall into it. In a few
hours the glass is filled with them.
The physician is very enthusiastic
over the invention, for he says it is
much easier than chasing flies all
over the house and then killing only
a few.

"It is also safer," he added, "than
the method I read of in a paper re-
cently, of tilling of a grocer who
used a pan of formaldehyde. I do
not doubt the success of the plan,
but formaldehyde is a deadly poison,
and it would be a bad thing to keep
around the house where there are
children. The soap suds method is
convenient and cheap and brings ex-
cellent results."

Cucumber Colic

A Florence (Arizona) man acci-
dentally discovered, this week, a new
way of inducing ants to change their
abode. He tossed a lot of cucumber
peelings around the main entrance
to a big ant nest, situated near his
back door. The ants devoured the
peelings with avidity, then retired
to their subterranean domiciles to
give digestion a chance. But in the
meantime they had not been unmin-
dful of their queen's weakness for
good things to eat and had carried
her a liberal supply of the newly
discovered delicacy.

A few moments later, he declares,
the queen and her retinue of retain-
ers marched out of the main portal
of the ant castle, followed by the
entire colony of ant subjects, and with
their backs humped up like that of
a camel, straightway disappeared in
the underbrush. They never return-
ed and Mac thinks they perished
from cucumber colic. Since witness-
ing the performance he has tried
this "moving food" on several ad-
jacent ant colonies with the same
results.

Tobacco Trust Called Down

The Federal Court, under whose
jurisdiction the American Tobacco
Company will work out dissolution,
handed down a decree Thursday,
August 4th, denying the company
right to extend or enlarge its busi-
ness in any manner before dissolu-
tion. If it attempts this, the Court
will name a receiver and stop ship-
ments. The company must name
an acceptable plan by December 30th.

LABOR DAY

A Proclamation by the Gov- ernor

Whereas, by an Act of Congress,
the first Monday in September of
each year has been designated as
Labor Day to be known and observed
as such; and

Whereas, it is fitting and proper
that one day in the year should be
set aside and observed as a holiday
in recognition of the fact that labor,
toil and effort constitute the basis
of all progress and all human wel-
fare.

Now Therefore, I, Richard E.
Sloan, Governor of the Territory of
Arizona, do hereby proclaim and de-
clare Monday, the 4th day of Sep-
tember, A. D. 1911, a legal holiday,
and recommend that insofar as may
be done without public inconveni-
ences all business be suspended, and
that the day be observed in a man-
ner befitting the occasion.

In witness whereof, I
have hereunto set my
hand and caused the
Great Seal of the Terri-
tory to be affixed.

Done at Phoenix, at the Capitol,
this 3d day of August, A. D. 1911.

RICHARD E. SLOAN,
By the Governor:
R. A. KIRK,
Asst. Secretary of the Territory of
Arizona.

HOMESTEAD LAW

Nearly 200,000,000 Acres Are
Now Available for Entry

The enlarged homestead law per-
mits the entry by one person of 320
acres of government land in the arid
States which is not, in the under-
standing of the government, sus-
ceptible of irrigation. As under
the original 160-acre homestead law,
this land can be acquired by the
settler from Uncle Sam free of cost,
on compliance with the regulations
requiring a residence and cultiva-
tion. The determination of what
lands are subject to these double-
sized homesteads devolves upon the
Secretary of the Interior, and since
the passage of the act in February,
1909, 190,254,495 acres have been
designated by him as subject to en-
try in units of 320 acres. Every
month additional lands are thus
designated, 90,242 acres having been
added to the total in June.

PETRIFIED FOREST AREA

Has Been Reduced One-half by
President's Proclamation

On August 3d President Taft
signed a proclamation reducing the
area of the petrified national park
in Arizona from 95 to 40 square
miles. The reduction is made on
the recommendation of Dr. George
P. Morrill, head curator of the
Geology National Museum, who has
just examined and reported that
outside of the new boundaries there
is practically nothing worth preserv-
ing.

Large tracts in the park are
marked off from which museums
authorized by the Secretary of the
Interior may take specimens.

PROBATE NOTICE

In the Probate Court, in and for
the County of Graham, Territory of
Arizona.

In the matter of the estate of
Petar Andarsan, deceased.

Notice of application for letters
of administration for posting.

Notice is hereby given that Ruth
Wilson Andarsan has filed with the
clerk of this court a petition, pray-
ing for letters of administration of
the estate of Petar Andarsan, de-
ceased, and that Saturday, the 26th
day of August, 1911, at 2 o'clock
p. m. of said day, being a day of
a regular term of this court, to-wit
of the July term, 1911, at the court
room of said court, in the court
house at Solomonville, Territory of
Arizona, in the said county of Gra-

Take It
Easy

To get the best of Backache
Get a Box of
Dr. Miles'
Anti-Pain Pills

Otherwise Backache
May get the best of you

Nothing disturbs the human
system more than pain whether
it be in the form of headache,
backache, neuralgia, stomachache
or the pains peculiar to women.
Dr. Miles' Anti-Pain Pills are a
standard remedy for pain, and
are praised by a great army of
men and women who have used
them for years.

"A friend was down with LaGrippe
and nearly crazed with awful backache.
I gave her one Anti-Pain Pill and left
another for her to take. They helped
her right away, and she says she will
never be without them again."

PROBATE NOTICE

In the Probate Court in and for
the County of Graham, Territory of
Arizona.

In the matter of the estate of
Horace L. Johnson, deceased.

Notice of application for letters
of administration for posting.

Notice is hereby given that Alva
E. Johnson has filed with the clerk
of this court a petition, praying for
letters of administration of the es-
tate of Horace L. Johnson, deceased,
and that Thursday, the 17th day of
August, 1911, at 11 o'clock a. m. of
said day, being a day of a regular
term of this court, to-wit of the
July term, 1911, at the court room
of said court, in the court house at
Solomonville, Territory of Arizona,
in the said county of Graham, has
been set for hearing said petition,
when and where any person inter-
ested may appear and show cause
why the said petition should not
be granted.

Dated July 31, 1911.
24-2t J. A. Woods, Clerk.
